DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Takashi et al (JP 2003-172634).

Re claim 1, Takashi et al disclose a holding structure for an electronic part (22), including a first mold (24) which has a positioning shape portion for the electronic part, and a second mold (21) which is insert-molded so as to cover the first mold and the electronic part positioned with the first resin mold, the second resin being provided with a connector (23, 23a) jointed to the electronic part, the positioning shape portion of the first mold is provided with a through hole (24b) for allowing an insert resin material to pass therein to form the second mold (Fig 2a, 2b).

Re claim 2, wherein said positioning shape portion has a cup-shaped configuration (24a) in which the electronic part is adapted to be inserted (Fig 2a).

Re claim 3, wherein said through hole is provided in a bottom wall of said positioning shape portion (Fig 2a)

Re claim 4, wherein said through hole provided in said bottom wall of said positioning shape portion includes two through holes (Fig 2a).

Re claim 5, wherein said through hole is provided in a side wall of said positioning shape portion (Fig 2a).

Re claim 6, wherein said through hole provided in said side wall of said positioning shape portion includes two through holes (Fig 2a).

Re claim 7, wherein a gap is provided between an inner wall surface of said positioning shape portion with a cup-shaped configuration, in which the electronic part, is adapted to be inserted, and the electronic part (Fig 2a).

Re claim 8, wherein said through hole guides said insert material to form said second mold into said positioning shape portion (Fig 1b).

The teaching does not disclose the first and second mold made of resin. It is well known in the electrical art to use resin for molding (applicant's specification page 1). It would have been obvious to one having ordinary skill in the art at the time the invention was made to use for resin for the first and second molds of Takashi for intended use, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. In re Leshin, 125 USPQ 416.

Response to Arguments

Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hung V. Ngo whose telephone number is (571) 272-1979. The examiner can normally be reached on Monday to Friday 9:00-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Diego Gutierrez can be reached on (571) 272-2800 EXT 31. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
